

# PELICAN QUICK-CHANGE MAIN BROOM

*Available to upgrade on existing Pelican NP model sweepers*

The Elgin Pelican's quick-change main broom is designed for simple, easy, and fast replacement. This option utilizes a hinged main broom arm that is secured in place with three bolts. Removing these bolts allow's the main broom arm to swing away so it can be pinned in place for unobstructed access. Replacment is as easy as aligning the new broom to the motor housing; sliding the keyed core back in place. Finally, securing the three bolts and replacing the step will finish the replacement procedure and your Pelican can resume sweeping.

- ✓ *Dramatic reduction of broom replacement time AND effort, increases uptime of your sweeper*
- ✓ *Eliminates the core removal and replacement of a standard main broom*
- ✓ *Available for new Pelicans AND replacement on existing NP models*

*Contact your local dealer for details on how to implement this new style main broom on your Pelican!*
